

GripDeck Slip Resistant Timber Decking

The **one thing** you will want to get under your feet

Safety under foot

Rain, frost or fallen leaves can very quickly turn timber decking into a treacherous surface, posing serious health and safety issues. GripDeck anti slip inserts provide an attractive and highly effective anti slip solution.

Our specially formulated resin-bonded aggregate inserts, add an attractive slip resistant finish to hardwood and softwood decking.

See overleaf and online for more information.

The Original and the best

GripDeck engineers created the original anti slip decking insert 20 years ago. We have now become the industry leaders, with a unique manufacturing process and production line, producing over 2000 linear metres per day.

Options to suit you

Our inserts are applied to both hardwood and softwood decking in various widths and thicknesses and lengths up to 5.1m. GripDeck use a special blend of epoxy resin, which bonds with the timber and aggregate. Options include,

- ① Choice of width
- ② Grooved or smooth profiles
- ③ Softwood or Hardwood
- ④ Choice of thickness
- ⑤ Coloured aggregate available

The highest non slip standards

GripDeck slip resistant decking has surpassed UK wet and dry anti slip standards. A Stanley Pendulum slip value co-efficient of 65 is required for any anti slip surface to be classed as having an extremely low risk of slip.

Sample	Dry	Wet	Slip Risk
2 strip, 145 mm	92	86	Extremely Low Risk
3 strip, 145 mm	93	75	Extremely Low Risk
2 strip, 120 mm	97	75	Extremely Low Risk
